Boating made better

There is no other outboard brand like it in the world. Suzuki Marine is truly unique. You may think all outboards look the same, but once you get under the surface, you'll see why those in the know, choose Suzuki Marine. Our distinctive character is not what you see, it's what you feel – better acceleration, better fuel efficiency and better value... Suzuki Marine – Boating Made Better.

BETTER ACCELERATION

When it comes to speed, we often say “give it a bit more”. With Suzuki Marine’s offset driveshaft you can do just that! It lets you run a larger diameter propeller at a higher pitch, providing better acceleration at any given RPM.

BETTER FUEL EFFICIENCY

Our Lean Burn technology delivers better fuel efficiency by predicting the amount of fuel you'll need to get where you need to go. Using real-time computer processors and sensors to optimise fuel delivery, it can deliver reductions up to 45%, taking control and precise timing to a new level in boating fuel efficiency!

BETTER VALUE

What you value is at the heart of our engine. Reliability that only comes with Japanese engineering; lower fuel consumption from Lean Burn technology and lower servicing costs with maintenance-free timing chains. Our multi-award winning products provide more value with features that are truly unique to Suzuki Marine.

Suzuki digital multi-function gauge

Suzuki Water Detecting System

Available on DF100B-350A (excluding DF150TX-DF175TX)

Water in the fuel can lead to problems that include poor combustion, lower power output, and corrosion. The Suzuki Water Detecting System is designed to help protect the engine from moisture in the fuel utilizing a water detecting fuel filter to alert the operator with both visual and audio warnings when water is present in the fuel. The filter also designed to let you check for water visually.
